Bucks Page

Screen or Element	The wireframe assumed	The mockup shows	What I will change
Homepage	The dashboard would display the user's financial summary, recent transactions, progress, and Bucks-related information in one organized layout.	The planned dashboard layout remains clear and the main information can be viewed without changing the structure.	No changes. The mockup confirmed that the original homepage layout works as planned.
Bucks Page	The Bucks companion would have its own page where users can interact with Bucks and view its reactions/progression.	The companion and its information fit naturally within the planned page structure.	No changes. The mockup confirmed that the Bucks page supports the intended gamified experience.
Bucks Page	Users would be able to add an income or expense using a simple form with the necessary information.	The form layout remains straightforward and provides enough space for the required fields and actions.	No changes. The original form structure is still appropriate.
Navigation	The main BUCKS sections would be accessible through consistent navigation.	The navigation provides a clear way to move between the main sections of the app.	No changes. The mockup confirmed that the navigation structure is easy to understand.
Goals Page	Users would be able to view their savings goals and track their progress toward each goal.	The goal cards and progress information remain organized and easy to understand.	No changes. The original Goals page layout works as intended.
Profile Page	Users would be able to view their profile information, progression, achievements, and Bucks-related information.	The planned profile information fits within the page without requiring major layout changes.	No changes. The mockup confirmed that the profile structure is suitable for the planned features.
